

CHAPTER 11 – "Eternal love"... a thing of the past

Even before TELL the WATERKNIGHTS found allies in Helvetia (cf. Chapter 6). Despite eons of earlier rivalry, together with the WATERKNIGHTS they wanted to advocate for ZEROWATERLOSS. But when the darkness gives way to light, the dark forces hit the water and from then on work, barely touchable, from clever hiding spots, always squabbling and spreading germs from the fungi. And the constant dripping also breaks marble, stone and iron. And so the "eternal love" turned into a brief affair. "HEAVY", says WATERKNIGHT Mbambo.

The WATERKNIGHTS take up the challenge. With a large-scale deployment of all forces and the support of the ZERO-WATERLOSS partners, in just 2 weeks they build structures in which **all ZEROWATERLOSS and DUKTUS products are now sold through VONROLL HYDRO** – friendly, competent and with minimum CO₂ emissions from the manufacturers' factories in Helvetia and Europe and the most efficient pipe and pipe fitting storage site in Helvetia in the Choindez valley. VONROLL HYDRO can also take over all current contracts from the previous affair without any delay and reliably supply the long-standing DUKTUS customers.
