

*Dr. William TELL  
will see you now...-*

*STOPR  
gets every  
hydrant  
fighting fit*

*Only a STOPR  
is the answer!*

### THE FINAL CHAPTER 16 – At least ...

After a battle lasting more than three years, the WHO was finally able to declare victory over COVID-19. This opened up energy and resources for strategic water concepts. And high time too. For too long, innovations and improvements in the global supply of water have lagged behind chemistry, despite warnings about the drought and water scarcity getting louder at an alarming rate. New conflicts are on the horizon. As already demonstrated through the network monitoring with TELL, ORTOMAT and INFRAPORT, the people of Switzerland are the first to view the water crisis as a water opportunity. Throughout the land, hydrants of every manufacturer have been fitted with STOPR. Dr William TELL – the WATERKNIGHT – and his many assistants are working together to keep water supplies fit and healthy.
